## AMENDMENT TO THE CLAIMS

## **Listing of Claims**:

1. (Currently Amended) A battery comprising:

a battery cell;

a circuit base board which is connected to terminals in the battery cell electrically via connection members; \( \Psi \) a heat protecting element, disposed in the connecting members, in which electric resistance increases according to an increase in a temperature therein; \( \Psi \) and a resin mold section which covers and \( \frac{fixes}{ixes} \) the circuit base board, the connecting members, and the heat protecting element so as to \( \frac{fix}{ix} \) thereof on the battery cell, wherein \( \Psi \) the heat protecting element is \( \frac{spaced}{ixposed} \) so as to be separated from a surface of the battery cell \( \frac{via}{ix} \) said space being filled with a resin of the resin mold section.

- 2. (Original) A battery according to Claim 1 wherein the heat protecting element is covered by a heat insulating member which has heat insulating characteristics to there outside.
- 3. (Original) A battery according to Claim 2 wherein the heat insulating member is a heat insulating sleeve which is provided an insertion section through which the heat protecting element can be inserted.
- 4. (Original) A battery according to Claim 1 wherein the connecting members are made of a metal plate.
- 5. (Original) A battery according to Claim 2 wherein the connecting members are made of a metal plate.
- **6. (Original)** A battery according to Claim 3 wherein the connecting members are made of a metal plate.
